

HANSAGENESIS

shaping your experience

HANSAGENESIS

the birth of a new design

HANSAGENESIS is born from a deliberate act of design – where artistry and craftsmanship come together to shape something lasting. In this journey from inspiration to creation, an idea takes form and the first perfected faucet lays the foundation for an entire product family.

The word 'genesis' signifies a beginning, the origin of something new. It reflects the transformation of raw material into a refined functional object, with the designer's skill and creativity captured in every detail. The result is more than a faucet. It is a piece of crafted design that brings form, function and beauty into balance.

Once released from its mold, the first HANSAGENESIS faucet stands complete: sculptural in form, intentional in every line. It carries with it the original vision that has now been shaped into something beyond the sum of its materials.

More than a visual statement, HANSAGENESIS is designed to refine the familiar. In daily routines, it offers moments of clarity and calm – shaping not only water, but the experience around it.

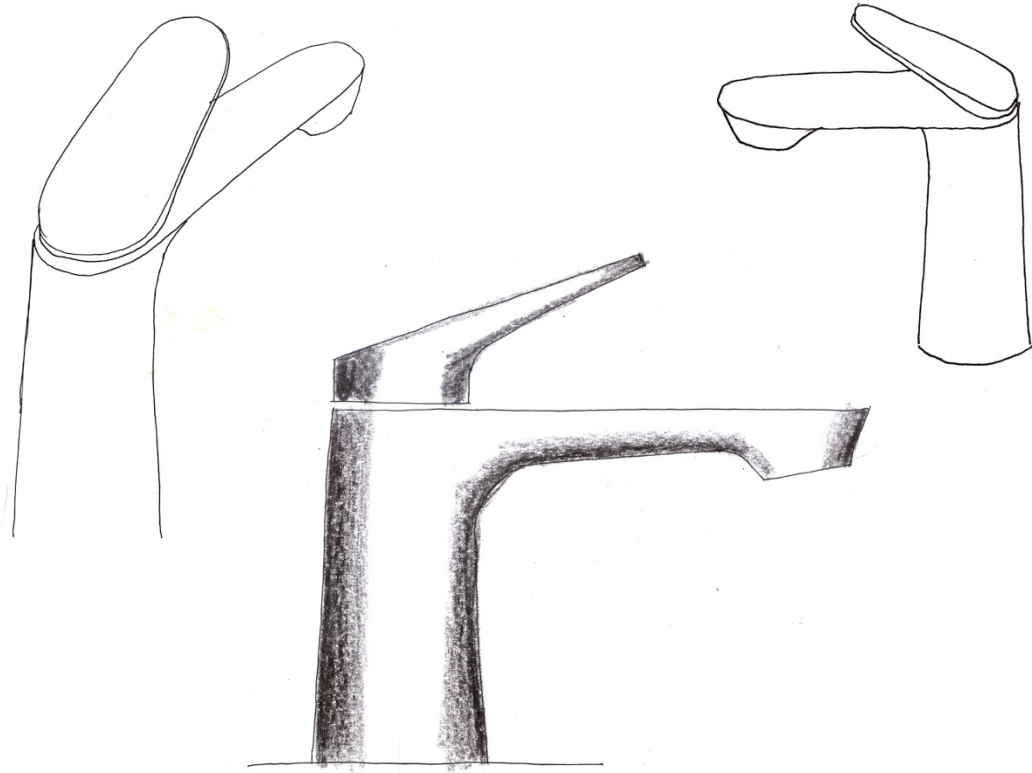

HANSAGENESIS

shaping your experience

Meet the designers

The HANSAGENESIS faucet family has been created in collaboration with the renowned Italian design studio Debiasi Sandri – named after its founders **Daniel Debiasi** and **Federico Sandri**.

The design duo has created works for a multitude of brands in several different fields. These partnerships have led to numerous international design awards – including for HANSAGENESIS.

Creating iconic design

“One of our main obsessions as designers is poise: finding the right balance between expressiveness and silentness, freshness and archetypes. HANSAGENESIS, with its sculptural design, aims to embody exactly this.”
- **Daniel Debiasi** and **Federico Sandri**

HANSAGENESIS

shaping everyday moments

Each day is a new beginning, presenting an opportunity to pause, reset and move forward. We all have our own habits that help us start the day. But more often than not, our mornings begin in a similar way: in the bathroom, using water.

These early moments are quiet and personal. Washing your face. Turning on the shower. Maybe even filling the bath. Simple routines that bring focus and calm. In a fast-moving world, they keep us grounded.

The **HANSAGENESIS** product family is made to shape these moments, whether at the washbasin, in the bath or taking a shower. Each faucet has been crafted to support daily rituals with true precision, balance and beauty. They introduce a sense of artistry into the bathroom.

A black, minimalist faucet stands over a thick, light-colored stone sink. The faucet has a long, horizontal spout and a tall, slender body. To the right of the faucet, a small wooden dish holds a bar of yellow soap. The background is a neutral, textured wall.

HANSAGENESIS

style for every washbasin

The HANSAGENESIS family offers a range of washbasin faucets designed to suit versatile needs and spaces. Whether you're looking for a classic centrepiece or a more spacious solution, each option combines refined proportions with timeless design.

Choose a standard model for everyday versatility, a higher version for added space or a swivel design with a side lever for extra flexibility.

For a more minimalist look, the concealed wall-mounted version brings elegance and ease to modern interiors.

Style that stands out

The distinctive design of the HANSAGENESIS washbasin faucets is defined by contrast. The top of the spout is perfectly even and smooth, while the faucet's round and flowing lines may surprise elsewhere. The solid body grounds the design, while the upward-angled lever introduces a sense of elegance and precision.

Every detail has been considered. The faucet's seamless surface has few visible joints or grooves, leaving no room for dirt or residue to settle. A tight sealing ring beneath the cap adds extra protection, preventing cleaning liquids from seeping inside. The result is a faucet that's as easy to maintain as it is to admire.

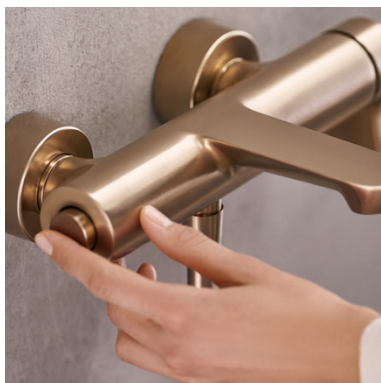

Spacious aerator design

The faucet's aerator has been thoughtfully designed. Unlike with typical faucets, space has been intentionally left between the aerator and the edge of the spout. This open design prevents water droplets from clinging to the spout.

If any drops remain, they collect on the silicone aerator, which is easy to clean and affordable to replace if needed. The result is less limescale buildup, easier upkeep and a faucet that stays in good condition for an extended time.

Elevating your experience

HANSAGENESIS shower faucets pair especially well with the HANSAAURELIA shower range. Together, they elevate everyday shower moments, turning them into immersive experiences.

From spout to hand shower

Switching from the spout to the hand shower is simple and intuitive as it can be done with a press of a single button.

Practical side lever

For the wall-mounted bath and shower faucets, the lever sits to the side – distinctive in shape and conveniently integrated into the overall design.

Designed to stand tall

The floor-mounted bath faucet has a strong and sculptural presence, which is elevated by a base socket that reinforces its clean, vertical lines.

HANSAGENESIS

for the bath and shower

Water has a unique way of resetting the body and mind. Whether it's a focused morning shower or a long evening soak, these moments bring clarity, calm and comfort.

HANSAGENESIS offers faucets for both the shower and bath – all crafted to match the strong and recognisable visual language of the broader family. The precise lines and distinctive shapes introduce a sense of harmony to the bathroom. Each faucet is united in appearance but still carries its unique charm.

HANSAGENESIS

shaping your experience

HANSAGENESIS is a combination of clean lines, elegant surfaces and carefully considered details. While many of the following features and benefits are shared across the

entire faucet family, others are tailored to specific models. Together, they reflect the care, precision and design that defines each piece.

Seamless design
Stylish look and also easy to clean.

Award-winning design
Recipient of the iF Design Award 2025.

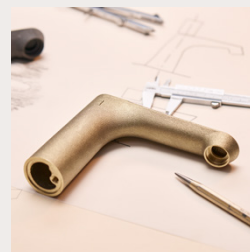

Space around the aerator
The gap to the spout edge simplifies maintenance.

Flexible volume limiter
Settings for 40%, 60%, 80% and full flow.

Hot water stop
Flexibly set the faucet's maximum temperature.

Low-lead brass
Already meets the EU Drinking Water Directive.

5-YEAR WARRANTY
We stand by our quality

10-YEAR PARTS SUPPLY
Spare parts for long-lasting products

100% European
HANSA is based in Germany and is fully European-owned.

Refined appearance

Slim, sculptural and timeless shapes.

Cleaning protection

A tight seal beneath the cap blocks cleaning liquids.

Ultra-precise finish

High quality surface available in four striking colours.

Cold start

Reduced energy consumption.

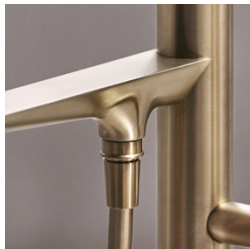

Flexible aerator angle

Direct the water stream exactly where needed (+/- 6°).

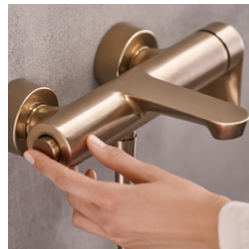

Side lever option

Added flexibility with a 120-degree swivel spout.

Built-in pull diverter

Easy to operate and fully integrated.

From spout to shower

Change to and from the hand shower with a single button.

Made for HANSABLUBOX

Easy installation with HANSA's concealed platform.

Minimalist rosettes

Only 8 mm thick for an elegant look.

UWL Eco label Class 2

Certified water efficiency with UWL Eco label, Class 2.

Elegant pop-up waste

Convenient to use, just push to open or close.
